

Wireshark -- The Supporting Cast

Stuart Kendrick, *Allen Institute for Brain Science*

Description

In this 1-3 hour class, we review applications bundled with Wireshark, publically available Wireshark add-ons, and common capture tools. This is mostly a lecture / show-and-tell type forum, but given sufficient time plus your laptop, we also practice using some of the tools.

Who should attend

Protocol analysts with experience using Wireshark who want an overview of supporting tools and techniques.

Take back to work

Practice analyzing real-world traces and the instructor's Profile library.
